**76**

# Highlights

A year of breakthroughs and successes

### Better Together

Collaboration is the cornerstone of ISGlobal's Education and Training approach.

### More Bang for Your Buck

Immunology and data science come together to reveal that the RTS,S malaria vaccine may offer broader protection than thought.

### Plan, Prepare, Prevent

Contributing to preparedness plans at the local, regional and global levels has become a key priority for the Policy and Global Development team.

### Shining a LAMP on Many

The ChagasLAMP consortium is looking for faster and more effective ways of diagnosing Chagas disease.

### The Double Risk of Being an Adolescent

Pregnant adolescents in sub-Saharan Africa are more likely to contract malaria than adult women.

### Turn Down the Noise!

60 million people in European cities are exposed to noise levels that are harmful to health.

### Catalysing Much-Needed Action

EU-funded CATALYSE project aims to guide and accelerate climate action to protect public health.

### Groovy Neighbourhoods

The urban environment can affect physical activity in people with chronic obstructive pulmonary disease (COPD).

### Screens and Teens

The largest case-control study to date finds no link between radiation from mobile phones and brain tumours in young people.

### Telltale Signatures

Environmental exposures during early life are associated with certain molecular profiles in childhood.

### The Way Out

More than 350 experts from over 100 countries reach a consensus on how to end COVID-19 as a public health threat without exacerbating the socio-economic impact or putting the most vulnerable at risk.
